Subject Index—Volume 6

A

Abscess (es)
experimental, external localization of; scanning staphylococcal abscesses with antibody to staphylococcus, 266

Absorptiometry, direct photon, estimation of bone and skeletal weight by, 52, 432

Acinus, human pulmonary, roentgenographic appearance of the, 171

Acromegaly
peritoneal and endosteal surface remodeling in, 260
some radiographic measurements of the hand in the diagnosis of, relative value of, 426

Airways, small, parasympathetic innervation of, in vivo roentgenographic examination of, 9

Angiocardiography
determination of cardiac output, 176
stroke volume correlation of the two cardiac ventricles in man, 44

Angiography
after end-to-side portacaval shunt; clinical, laboratory, and pharmacoangiographic observations, 101
cerebral; radionuclide imaging and tumor vascularity in supratentorial gliomas, 388
pancreatic, selective canine, effect of secretin and pancreozymin on, 133
pharmacologic (and arterial pharmacotherapy) of the gastrointestinal tract, new developments in, 199
pulmonary, in fetal lambs; the effects of maternal hyperoxia and hypoxia; preliminary report, 402
pulmonary, in the dog, histamine release and some associated hemodynamic effects during—Contrast media as histamine liberators, 110

Aortography, abdominal, occurrence of paraplegia in; relation to arterial blood pressure and time of passage for sodium acetrizoate, 410

Arteriography
precision, with ultrasonic timing, 65
renal, selective, in rabbits, cell injury and cell regeneration in; a preliminary report, 299

Association of University Radiologists, proceedings of, 333

B

Blood flow
patterns, particulate radiographic contrast material for quantitative representation of; I. theoretical considerations, 27
portal vein, radiologic assessment of; description of method and application, 146
pulsatile and non-pulsatile, lipiodol droplets in cineradiographic quantitation of, 141
to the muscle and mucosa of the rat esophagus, distribution of, 255

Bone
and skeletal weight, estimation of, by direct photon absorptiometry, 52
long, fractures, non-union of, roentgenologic findings in, 217
mineral measurement; a question of the reliability of in vitro studies, 225
unaltered cortical area of pregnant and lactating women; studies of the second metacarpal bone in North and Central American populations, 119

Bronchography
inhalation, 433
pediatric; the problem of segmental pulmonary loss of volume. I. A retrospective study of 165 pediatric bronchograms, 89; II. An experimental investigation of the mechanism of pulmonary collapse during bronchography under general anesthesia, 95
peripheral morphology in the normal human lung, 161
tantalum, in vivo roentgenographic examination of parasympathetic innervation of small airways; use of powdered tantalum and a fine focal spot x-ray tube, 9

C

Cardiac output, angiographic determination of, 176

Catheter (s), a simple non-thrombogenic coating of, 280

Cell, injury and regeneration in selective renal arteriography in rabbits; a preliminary report, 299

Chest roentgenograms, screening of, by advanced roentgen technologists, 76

Cholecystography, a comparative clinical study of two agents, 249

Cineangiography in mitral regurgitation; a comparison of cineangiography with other methods of assessment, particularly constant infusion of ^{133}Xe, 416

Cineradiography, quantitation of pulsatile and non-pulsatile blood flow, lipiodol droplets in, 141

Congenital heart disease, adolescent, delayed skeletal growth and maturation in, 326

Contrast media
- comparison of sodium methylglucamine diatrizoate of minimal sodium content with a pure methylglucamine diatrizoate preparation, 115
- histamine liberators. III. Histamine release and some associated hemodynamic effects during pulmonary angiography in the dog, 110; IV. In vitro mast cell histamine release by methylglucamine salts, 186
- intra-arterial, on the small intestine of rats, effect of; a preliminary report of an electron microscope study, 392
- isolation of sodium as a cause of ventricular fibrillation, 245
- particulate, for quantitative representation of blood-flow patterns. III. Theoretical considerations, 27

Cortical thickness, unaltered, of pregnant and lactating women; studies of the second metacarpal bone in North and Central American populations, 119

D

Diagnosis of acromegaly, some radiographic measurements of the hand in the, relative value of, 426

Diagnostic signs, analyzing use of, 18

Diagnosticians, training of; analyzing use of diagnostic signs, 18

Dilantin administration, chronic, absence of rickets after; experimental radiological observations in rats, 152

Doppler ultrasound—Precision arteriography with ultrasonic timing, 65

E

Embolization, transcatheter, with a silicone rubber preparation; experimental observations, 304

Esophagus
- labeling with small tantalum wires; effects on motility and histology, 191
- rat, distribution of blood flow to the muscle and mucosa of the, 255

F

Fracture, long bone, non-union of, roentgenologic findings in; an experimental study, 217

G

Gastrointestinal tract, pharmacoangiography (and arterial pharmacotherapy) of the, new developments in, 199

Glioma (s), supratentorial, radionuclide imaging and tumor vascularity in, 388

H

Hemodynamic effects and histamine release during pulmonary angiography in the dog—Contrast media as histamine liberators, 110

Hip, roentgenography of the, further observations on the value of traction during, 1

Histamine
- release and some associated hemodynamic effects during pulmonary angiography in the dog—Contrast media as histamine liberators, 110
- release, by methylglucamine salts, in vitro mast cell—Contrast media as histamine liberators, 187

Historadiography stain, osteomalacia studied by, micromorphology of, 122

Holography, image reconstruction from planigraphic sections, 221

Hyperoxia and hypoxia, maternal, effects of; pulmonary angiographic patterns in fetal lambs, 402

Hyperparathyroidism, periosteal and endosteal surface remodeling in, 261

Hypoxia and hyperoxia, maternal, effects of; pulmonary angiographic patterns in fetal lambs, 402

I

Image digitization, capabilities of a single scan TV-radiographic system for, 273

Image processing; effects of non-linearities on the television display of x-ray images, 315

Innervation, parasympathetic, of small airways, in vivo roentgenographic examination of; use of powdered tantalum and a fine focal spot x-ray tube, 9

Intestinal lactase deficiency, assessment of a radiographic method for diagnosis of; a prospective study, 40

Intestine, small, of rats, effect of intra-arterial contrast media on the; a preliminary report of an electron microscope study, 392

Intussusception preceded by a mechanism of the kink formation, 61

Iobenzamic acid and iopanoic acid; a comparative clinical study of two cholecystographic agents, 249

Iopanoic acid and iobenzamic acid; a comparative clinical study of two cholecystographic agents, 249

K

Kidney, papillary necrosis of, experimental; progressive changes on intravenous urography, 239

L

Lactation and pregnancy, in women, unaltered cortical area of; studies of the second metacarpal bone in North and Central American populations, 119

Lactase deficiency, intestinal, assessment of a radiographic method for diagnosis of; a prospective study, 40

Limb volume, radiographic measurement of, 212

Lipiodol droplets in cineradiographic quantitation of pulsatile and non-pulsatile blood flow, 141

Lung, human, normal, peripheral bronchographic morphology in the, 161

M

Macroaggregated albumin particles (MAA); intracoronary injection of, for external myocardial perfusion imaging, feasibility and hazards of the, 379

Methylglucamine diatrizoate, pure, preparation, comparison with a sodium methylglucamine diatrizoate contrast medium of minimal sodium content, 115

Methylglucamine salts, in vitro mast cell histamine release by—Contrast media as histamine liberators, 186

Mitral regurgitation, cineangiography in; a comparison of cineangiography with other methods of assessment, particularly constant infusion of ^{133}Xe, 416

Morphology, peripheral bronchographic, in the normal human lung, 161

Motility and histology, effects on; esophageal labeling with small tantalum wires, 191

Muscle and mucosa of the rat esophagus, distribution of blood flow to the, 255

Myocardial perfusion, external, imaging, feasibility and hazards of the intracoronary injection of radioactive serum albumin macroaggregates for, 379

N

Necrosis, renal papillary, experimental; progressive changes on intravenous urography, 239

O

Osteomalacia, micromorphology of, studied by stain historadiography, 122

Osteoporosis
disuse, periosteal and endosteal surface remodeling in, 260

idiopathic, periosteal and endosteal surface remodeling in, 260

P

Pancreatography, reflux; experimental observations in the cat, 321

Pancreozymin and secretin, on selective canine pancreatic angiography, effect of, 133

Paraplegia in abdominal aortography, occurrence of; relation to arterial blood pressure and time of passage for sodium acetrizoate, 410

Pharmacoangiography (and arterial pharmacotherapy) of the gastrointestinal tract, new developments in, 199

Planigram sections, holographic image reconstruction from, 221

Portacaval shunt, end-to-side, angiography after; clinical, laboratory, and pharmacoangiographic observations, 101

Pregnancy and lactation, in women, unaltered cortical area of; studies of the second metacarpal bone in North and Central American populations, 119

Pulmonary veins, study of the dynamics of, by a new method; preliminary report, 310

R

Radiography, magnification, effect on image quality due to focal-spot variation in, 70

Radiography
measurement of limb tissue volumes, 212
measurements of the hand in the diagnosis of acromegaly, relative value of, 426
method for diagnosis of intestinal lactose deficiency, assessment of; a prospective study, 40

Reflux pancreatography; experimental observations in the cat, 321

Rickets, absence of, after chronic Dilantin administration; experimental radiological observations in rats, 152

Roentgenogram (s), chest, screening of, by advanced roentgen technologists, 76

Roentgenography
appearance of the human pulmonary acinus, 171
of the hip, further observations on the value of traction during, 1

S

Scanning staphylococcal abscesses with antibody to staphylococcus; external localization of experimental abscesses, 266

Secretin and pancreozymin on selective canine pancreatic angiography, effect of, 133

Skeletal growth and maturation, delayed, in adolescent congenital heart disease, 326

Sodium as a cause of ventricular fibrillation, isolation of, 245

Sodium diatrizoate, contrast medium of minimal salt content, comparison with a pure methylglucamine diatrizoate preparation, 115

Stroke volume correlation of the two cardiac ventricles in man, angiocardiographic method in, 44

T

Tantalum wires, small, esophageal labeling with; effects on motility and histology, 191

Traction during roentgenography of the hip, further observations on the value of, 1

Transcatheter embolization with a silicone rubber preparation; experimental observations, 304

Turner's syndrome, periosteal and endosteal surface remodeling in, 260

TV display of x-ray images, effects of non-linearities on the, 315

TV-radiographic system, single scan, for digital data acquisition, capabilities of a, 273

U

Ultrasonic timing with precision arteriography, 65

Urography, intravenous, progressive changes on; experimental renal papillary necrosis, 239

V

Vein (s), pulmonary, study of the dynamics of, by a new method; preliminary report, 310

Ventricle (s), cardiac, two, angiocardiographic stroke volume correlation of the, 44

Ventricular fibrillation, isolation of sodium as a cause of, 245
